Attention: Mr. C. Lew

Dear Sir:

Re: Pyplok Swage Marine Fittings

With reference to your information package and letter, dated 1st March 1989, regarding the use of the above mentioned fittings in Canadian vessels.

You are advised that while Coast Guard Ship Safety does not approve the design of pipe fittings as such, there would, based upon the Classification Society documentation, be no objection to the use of these fittings in Canadian Registered vessels.

This would be subject to the manufacturer's guarantee of physical properties and suitability for the intended service and provided the installation is carried out in accordance with the manufacturers instructions to the satisfaction of a Ship Safety Marine Surveyor.

In all cases the piping details should be submitted to this service for evaluation before any installation is commenced.

Yours truly,

(for)

T.G.W. Brown,
Chief, Design and Construction,
Ship Safety Branch,
Canadian Coast Guard.
